

Dear Parent,

**Ernulf Academy and Longsands Academy
2018 Tanzania Scuba Expedition**

This summer over 1800 students travelled to locations across Africa, Asia and South America with Camps International where they made a valuable contribution to a range of community, wildlife and environmental projects before taking on an adventure challenge of Jungle trekking, Mountain trekking or Scuba Diving.

The students who chose to participate in this expedition gained a great deal from doing so, enhancing their chances of going into further education or gaining future employment in what is currently a very competitive market.

Students developed a whole host of skills from leadership, communication, problem solving and decision making to use of initiative, financial management, team building and social networking. The development and experiences students gain from both the expedition and the journey to get there really is unlimited.

We are pleased to announce that both Ernulf Academy and Longsands Academy are working with Camps International to give your son/daughter the same opportunity during the summer of 2018 and we have chosen Tanzania as our destination and both schools will travel together as one team.

Camps International will be launching the expedition to students after half term and this letter is to give you prior notice of the proposed expedition. In the meantime, please save the below date which is when we plan to run the parent's presentation evening:

Thursday 10th November at 6.30pm in the Main Hall at Longsands Academy
